

FitBuddy AI — Customer Journey Map

Phase 2 • Requirement Analysis

Source note: Journey stages are directly aligned with the documented application workflow and demonstration procedure.

Journey stages

1. Open application

- User opens the FitBuddy dashboard.
- Initial interface provides the profile form and Current plan area.

2. Complete profile

- User provides name, age, goal, experience, days/week, session duration, diet, equipment, limitations, and preferences.

3. Generate plan

- Frontend submits the profile; backend stores/updates the profile and requests plan generation.

4. Review plan

- Generated weekly plan is displayed in the Current plan panel.

5. Give feedback

- User records rating, energy, difficulty, and comments.

6. Refine plan

- Feedback is stored and used for automatic rule-based adjustments; the next Generate again action produces the refined plan.

7. Coach/API access

- Coach/API endpoints expose summaries and operational data.
