

FitBuddy AI — Functional Features

Phase 5 • Project Development Phase

Implemented/documented features

- Responsive user dashboard.
- Profile/onboarding form.
- AI-generated weekly workout and nutrition guidance.
- Gemini integration through the configured AI path.
- Local deterministic demo mode.
- SQLite persistence.
- Feedback capture after plan generation.
- Automatic rule-based plan adjustments from feedback.
- Coach dashboard with user, plan, and feedback summaries.
- JSON REST endpoints.
- Health check endpoint.
- FastAPI-served frontend with no Node.js build step.

Documented example profile

- The supplied demonstration describes a weight-loss goal, six days/week, 60-minute sessions, balanced diet, dumbbells/mat, and short workouts/outdoor cardio. This is a demonstration example, not a requirement for every user.
