

FitBuddy AI — Project Setup & File Guide

Phase 7 • Project Documentation

Project file set

- The supplied project materials include README.md, requirements.txt, .env.example, .gitignore, and the project documentation file.
- The documented source structure also includes app/, data/, and tests/ directories with the modules described in the architecture documentation.

Windows setup

- `cd FitBuddy-AI`
- `py -3 -m venv .venv`
- `.\.venv\Scripts\Activate.ps1`
- `python -m pip install --upgrade pip`
- `pip install -r requirements.txt`
- `Copy-Item .env.example .env`

Run

- `uvicorn app.main:app --reload`
- Open the user app at `http://127.0.0.1:8000/`.
- The documented project also provides `/coach`, `/docs`, and `/health`.

Security

- Do not include a real API key in documentation, screenshots, GitHub commits, or shared archives. The supplied .env contained credential-like material and is intentionally not copied into this deliverable.
