

FitBuddy AI — Demonstration Communication Guide

Phase 8 • Project Demonstration

30-second project explanation

- FitBuddy AI is a local-first fitness planning web application. It collects a user's fitness profile and preferences, generates a weekly plan, stores feedback, and can refine the next plan using rule-based adjustments. It also provides a coach dashboard and REST APIs.

Presentation sequence

- Introduce the problem and project objective.
- Show the project structure and local application.
- Explain demo mode and safe environment configuration.
- Complete a sample profile.
- Generate and review the weekly plan.
- Submit feedback.
- Generate again and show the adjustment.
- Close with architecture, testing, and future scope.

Safety wording

- State that FitBuddy is an educational software demo and not medical advice, consistent with the supplied documentation.
