

FitBuddy AI — Demonstration of Proposed Features

Phase 8 • Project Demonstration

Feature demonstration checklist

- Responsive dashboard.
- Profile/onboarding form.
- Weekly workout and nutrition guidance.
- Local deterministic demo generation.
- Optional Gemini-based generation.
- SQLite persistence.
- Feedback capture.
- Automatic rule-based plan adjustment.
- Coach dashboard.
- JSON REST APIs.
- Health check and Swagger/OpenAPI documentation.

Expected visible outcome

- A successful demonstration should show a working dashboard where a profile can be saved, a weekly plan can be generated and displayed, feedback can be recorded, and a later generation can incorporate that feedback.
