

FitBuddy AI — Project Demo Planning

Phase 8 • Project Demonstration

Exact demonstration order

- 1. Open the FitBuddy-AI folder and verify structure.
- 2. Configure .env from .env.example with DEMO_MODE=true for a simple local demonstration.
- 3. Start Uvicorn and open the root URL.
- 4. Fill in profile details and select Save profile & generate plan.
- 5. Review the generated weekly plan.
- 6. Submit rating, energy, difficulty, and comments.
- 7. Select Generate again and review the latest adjustment.

Sample documented scenario

- Goal: weight loss.
- Frequency: six days/week.
- Session duration: 60 minutes.
- Diet: balanced.
- Equipment: dumbbells/mat.
- Preferences: short workouts/outdoor cardio.

Demo evidence to capture

- Project structure screen.
- Environment configuration with secrets redacted.
- Initial FitBuddy interface.
- Completed profile and generated plan.
- Weekly plan details.
- Feedback section.
- Adjusted plan.
